

## CONTAINER NOVUTIERRA 2017

A few comments beforehand to the goods in general: we prefer natural materials over plastic, wherever it makes sense. There is not really a recycling system here in Uruguay and all what breaks is basically garbage if we cannot reuse it ourselves. Plastic very fast deteriorates in this climatic circumstances.

Things should be always sturdy and in good shape, it makes no sense to transport garbage over the ocean. Machines should be as simple as possible for self-repair reasons. China and glasses should be flawless, no broken edges or corners.

Please try everything if it is still functioning before sending (like lamps, stereosystems, loudspeakers, machines, etc.)

Now here comes the list:

### KITCHEN

- cutlery stainless steel sturdy
- china (small plates, big plates, soup plates, glasses, serving plates, bowls big and small)
- pots and pans big
- good kitchen knives, japanese knives
